What Kids Are Reading

2020 EDITION

Exploring Nonfiction Reading
P. 14

Establishing Background Knowledge
P. 24

Making Career Connections
P. 34
More than ever, as so many worldly distractions and face-timing devices compete for our children’s attention, the concept of sitting still to hold and enjoy a book is far down their want-to-do lists.

Books compete with all the social media amusements, the latest games, and the TV remote. Sitting still to read a book? Later. Much later. Perhaps not at all. And that’s too bad.

But there’s plenty of hope for young readers. We’ve seen kids toss aside their phones and grab a book, run to a shade tree, and dive in. The secret to this enthusiasm? Literacy delight!

Back in 2013, I founded Madison Reading Project, a nonprofit organization with a goal to do whatever it takes to get kids fired up about enjoying reading. I saw the book vs. everything else distractions with my two kids and knew it was everywhere. Something needed to be done.

The key to success came quickly. Give kids a choice of new, current titles that they could take home—free of charge—and keep and share with their siblings and friends. Offer guided selection and encouragement. Take time to read them a story. Get creative with literacy crafts. Then, stand back and watch in amazement how a new love for books is kindled.

Pete the Cat, Diary of a Wimpy Kid, and Pigeon became beloved series; Eric Carle, David Shannon, and Mercer Mayer their literary heroes.

This past spring we launched our Big Red Reading Bus—an oversized van retrofitted with shelves for over 2,000 books. Thanks to robust fundraising efforts, our staff of part-time educators and volunteers gave away 45,000 free books and held 176 literacy-related programs for 23,000 kids as we motored to summer school programs, family festivals, day camps, food pantries, neighborhood centers—anywhere kids gathered—throughout South Central Wisconsin. We took a special interest in reaching underserved kids and children of color, to grow their home libraries and offer as many diverse books as we could.

Educators can use the lists in What Kids are Reading and indeed conquer the distractions and create literacy delight. It worked for us!

Rowan Childs
Founder/Executive Director
Madison Reading Project
Spreading reading joy is what getting kids hooked on reading is all about.
Why is the sky blue? How do airplanes fly? Why do zebras have stripes?

Children are born with a natural curiosity about their world, and their frequent, varied questions are evidence of that. Books featuring baby animals, how things work, snakes, sharks, and weird-but-true scenarios spark many of these questions and are a natural starting point for finding their answers.

All books, but especially nonfiction titles—complete with awesome, graphic illustrations—serve as powerful vocabulary builders and provide key information that students’ eager minds gobble up. Encounters with new words and knowledge provide a solid foundation for students’ learning, first as a precursor to making meaning of the words on a page, and later as the basis for learning and retaining information from reading.

As a third-grade intervention teacher, I am constantly on the hunt for books to help motivate my students to read, and to increase the time they spend reading outside of school. I have discovered a fantastic resource to do just that—the What Kids Are Reading report.

This annual report aggregates national reading data to provide lists of books kids are reading most in every grade, along with the book with distinct popularity in each state for the grade range. What Kids Are Reading also features cross-curricular lists, by grade range, of nonfiction and fiction reading pairs of increasingly more challenging text on science, social studies, and arts topics.

As a nonfiction enthusiast, my favorite part of the report is this year’s emphasis on nonfiction, such as the lists of 10 digital nonfiction books for each grade. My students—especially reluctant or resistant readers—gravitate toward nonfiction because they relate to real-life people, places, and events. Easy access to nonfiction is so important for all kids to learn about the world around them, but it’s key for children with limited experiences or exposure to the external world. Nonfiction is their portal to learning about a wide variety of topics, and interesting revelations about our world, history, and the people who impact our lives.

Reading nonfiction aloud to kids is especially impactful to model good reading habits and to help them access information at higher reading levels than they could read on their own. And because nonfiction is a favorite genre of mine, students “catch” the excitement I bring to each nonfiction lesson!

Sparking students’ interest and helping them unlock the information they are interested in helps to expand their world view and lay a strong foundation of background knowledge, both of which will help kids develop the critical reading skills they’ll use to tackle their independent reading.

Three Research Spotlights tucked between the report’s book-list sections examine students’ data beyond what they are reading to explore nonfiction reading, probe into how students gain background knowledge, and discuss reading students for the reading they’ll do in occupations beyond schooling.

A hidden gem of this report, for educators and students alike, are the essays from popular authors—most of whom write nonfiction!—Cari Meister, Drew Daywalt, Melissa Stewart, Isabel Thomas, and Janet Riehecky.

Spreading reading joy is what getting kids hooked on reading is all about. When this report comes out every year, I simply show my students the books trending for their grade level. I don’t have to do much of a “sales pitch” for these titles because I’ve found that my students love to read what other kids their age are reading. (Think positive peer pressure!)

I hope the 2020 edition of What Kids Are Reading helps to spark the same enthusiasm for you and your students.
In kindergarten through second grade, a whole new world is opening to children as groups of letters and words on the page begin to take shape and have meaning. Now is the time to lay the groundwork for positive reading experiences by building upon students’ enthusiasm for this newly learned skill.
Of the top 100 books read in grades K–2, the book covers displayed in the map represent the books where the reading popularity in a state was in greatest contrast to the nationwide popularity ranking for that book. These are signature books for each state because kids who live there read the book shown far more often than it’s read in the nation as a whole.

Encourage young readers by offering books with colorful characters—both real and imagined—that spark their imagination. Get started inspiring your K–2 readers with the book lists on the next page:

- 20 most popular books for their grade
- 10 top nonfiction digital reads for their grade
- 3 sets of nonfiction and fiction book pairs of increasing text difficulty on social studies, science, and arts topics for their grade range

As you peruse the lists, note: Each book includes readability information (Renaissance ATOS® level, Interest Level, and Lexile® measure) to help guide students’ individual book searches. Series titles are grouped as single entries to allow as many unique book recommendations as possible. The icons NF SP and myON indicate titles on nonfiction topics, available to read/quiz on in Spanish, and/or available in Renaissance myON®. Popular author Cari Meister has contributed an essay on her favorite character—literary or otherwise—which is found in the sidebar on p. 9.

For more on the data used in this report, see p. 46.
During the 2018–2019 school year, 231,799 kindergartners each read, on average, 22.4 books and 7,234 words. Overall, approximately 45% of books were read to students, 22% were read with students, and 33% were read independently.

Top 20 Books Read: Kindergarten

1. **Biscuit Series**
   Alyssa Satin Capucilli (0.7–1.6, LG, 140L–500L)

2. **Dr. Seuss Collection**
   Dr. Seuss (0.6–5.2, LG, 180L–1000L)

3. **Pete the Cat Series**
   James Dean (1.2–4.3, LG, 160L–640L)

4. **The Very Hungry Caterpillar**
   Eric Carle (2.9, LG, 460L)

5. **Elephant & Piggie Series**
   Mo Willems (0.5–1.4, LG, 40L–330L)

6. **Pigeon Series**
   Mo Willems (0.7–1.5, LG, 280L–470L)

7. **Big Egg**
   Molly Coxe (0.4, LG, 220L)

8. **David Series**
   David Shannon (0.9, LG, 210L)

   Bill Martin Jr. (1.5, LG, 200L)

10. **Itchy, Itchy Chicken Pox**
    Grace Maccarone (0.7, LG, 280L)

11. **Sleepy Dog**
    Harriet Ziefert (0.8, LG, 80L)

12. **Clifford Series**
    Norman Bridwell (0.4–4, LG, 130L–630L)

13. **Big Brown Bear Series**
    David McPhail (0.4–3.2, LG, 140L)

14. **Cat Days**
    Alexa Andrews (0.4, LG, 130L)

15. **Cat Traps**
    Molly Coxe (0.4, LG, 110L)

16. **Come Here, Tiger!**
    Alex Moran (0.3, LG, 150L)

17. **Rick Is Sick**
    David McPhail (0.4, LG, 80L)

18. **Bugs!**
    Patricia C. McKissack (0.4, LG, 110L)

19. **Tiny Series**
    Cari Meister (0.5–1.3, LG, 180L–220L)

20. **The Snowy Day**
    Ezra Jack Keats (2.5, LG, 500L)

Popular Digital Nonfiction Reads: Kindergarten

- **Fast Cars**, Barbara Alpert (2.9, LG, 710L)
- **Megalodon**, Janet Riehecky (1.6, LG, 450L)
- **Dogs**, Martha Rustad (3.3, LG, 620L)
- **Football ABC**, Mark Weakland (2.2, LG, 360L)
- **Hot and Cold**, Ann Corcorane (40L)
- **Let’s Clean Up!**, Jenna Laffin (BR)
- **Gumball**, Dr. Jean Feldman & Dr. Holly Karapetkova
- **Over in the Meadow**, Dr. Jean Feldman & Dr. Holly Karapetkova (440L)
- **Bunnies**, Colleen Sexton (1.0, LG, 320L)
- **The Alphabet Forwards and Backwards**, Dr. Jean Feldman & Dr. Holly Karapetkova
As I think about this topic, it’s dumping snow—which always reminds me of Little Bear. Sweet, imaginative Little Bear. I read Little Bear so many times as I was learning to read that the lines still run through my head. “It is cold. See the snow. See the snow come down.” The pairing of Sendak’s charming illustrations with the recognition that Little Bear was so much like me—flawed, but earnest—instantly drew him to my six-year-old heart, where he remains. But is Little Bear my favorite?

As I watch my athlete sons in the kitchen trying to convince themselves that salad is far superior to cookies, I immediately think of Frog and Toad. I don’t tie string around the cookie box, or climb a ladder to put the cookies on a high shelf, but I do hear Frog clearly summoning me with, “Hey, birds, here are cookies!” I must heed Frog’s call, so I leave my desk and eat all the cookies. I feel a strange sense of accomplishment helping my boys with their willpower and seriously consider naming Frog and Toad my favorite.

I stay in the wetlands awhile and think about Toad in his bathing suit—oh how I related to Toad! Growing up, my sister was Frog—long and lithe. I, on the other hand, was Toad. But it’s the end of that story that left its mark.

“Toad climbed out of the river… The turtle laughed. The lizards laughed. The snake laughed. The field mouse laughed, and Frog laughed. ‘What are you laughing at, Frog?’ said Toad. ‘I am laughing at you, Toad,’ said Frog, ‘because you do look funny in your bathing suit.’” Of course I do,” said
During the 2018–2019 school year, 798,874 first graders each read, on average, 46.8 books and 27,971 words. Overall, approximately 15% of books were read to students, 15% were read with students, and 70% were read independently.

- **Baby Dogs**, Kari Schuetz (1.1, LG, 360L)
- **Penguins!**, Anne Schreiber (3.8, LG)
Toad. Then he picked up his clothes and went home. “Poor Toad! For a long time, I skipped that chapter—it bothered me too much. But one day, I read it again. And I accepted it—the animals were right. Toad DID look funny in a bathing suit. Yet how did Toad react? Did he cry or scream or act mean? No. He simply “picked up his clothes and went home.” In a very big way, it bolstered me to just be me. Yes, I absolutely adore Frog and Toad, but are they my favorite?

I walk over to my bookshelf and stop instantly. Of course! How could I forget? The yellow book with the daisy wallpaper jacket! If I could go back to my elementary school library, I would know exactly where to look to check it out for the 100th time (third row on the left, about two sections in, on the bottom shelf).

My favorite characters are... the hilarious... the ginormous... the remarkably human... George and Martha!

It dawns on me why I write for the youngest readers—this is where I found all my best friends.
During the 2018–2019 school year, 1,076,623 second graders each read, on average, 60.6 books and 87,287 words. Overall, approximately 10% of books were read to students, 7% were read with students, and 83% were read independently.

**Top 20 Books Read: Grade 2**

Exploring Nonfiction Reading

How much nonfiction do students read?
Nonfiction books and informational texts cover topics both great and small and far and wide to satisfy kids’ endless curiosity or dazzle them with fresh new facts.

1 in 4 books read in grades K–12 is nonfiction.

With a digital library, what portion of time do students spend reading nonfiction books?
With easy access to a variety of texts at students’ fingertips in myON, the time students spend reading nonfiction mirrors the National Assessment of Educational Progress (NAEP) informational text passage guidelines for 4th (50%) and 8th (55%) grade, but falls short of the high school recommendation (70%).

Students spend about half their time on nonfiction with digital access

Source: Accelerated Reader and myON databases, 2018–2019 school year
Our success as students, citizens, and workers depends in large part upon our ability to read and understand informational or nonfiction texts. The extent to which students of all ages have access to those texts and are encouraged to read them is critical. When students engage with these texts, they not only build content-area knowledge about their natural and social world, they also practice key skills such as citing evidence and evaluating arguments.

How does the text difficulty of nonfiction versus fiction books stack up?
Overall, nonfiction books are written at a higher difficulty level due to the vocabulary and subject matter they contain, so their reading levels are higher than fiction books.

Nonfiction is written at higher difficulty levels than fiction, a gap that grows by grade

How does the text difficulty of nonfiction versus fiction books stack up?
Overall, nonfiction books are written at a higher difficulty level due to the vocabulary and subject matter they contain, so their reading levels are higher than fiction books.

Do students understand nonfiction texts as well as they do fiction?
Although nonfiction is sometimes perceived as more difficult to comprehend than fiction, students actually pass the majority of quizzes taken on either type of book.

Passage rates on quizzes for fiction books are only slightly higher than for nonfiction
In the upper elementary grades, kids are reading with greater automaticity, while focusing less on how to read and more on what they are reading. At this stage, they begin to connect with characters, develop specific interests, and seek out answers.
Of the top 100 books read in grades 3–5, the book covers displayed in the map represent the books where the reading popularity in a state was in greatest contrast to the nationwide popularity ranking for that book. These are signature books for each state because kids who live there read the book shown far more often than it’s read in the nation as a whole.

Encourage students’ reading momentum by establishing routines, supporting their interests, and offering lots of choice. Inspire your 3–5 readers with the book lists on the next page:

- 20 most popular books for their grade
- 10 top nonfiction digital reads for their grade
- 3 sets of nonfiction and fiction book pairs of increasing text difficulty on social studies, science, and arts topics for their grade range

As you peruse the lists, note: Each book includes readability info (ATOS level, Interest Level, and Lexile measure) to help guide students’ individual book searches. Series titles are grouped as single entries to allow as many unique book recommendations as possible. The icons indicate titles on nonfiction topics, available to read/quiz on in Spanish, and/or available in myON. Popular author Drew Daywalt has contributed an essay on his favorite character—literary or otherwise—which is found in the sidebar on p. 19.

For more on the data used in this report, see p. 46.
During the 2018–2019 school year, 1,158,568 third graders each read, on average, 52.3 books and 195,000 words.

Top 20 Books Read: Grade 3

1. Dog Man Series
   Dav Pilkey (2.3–2.6, LG, 280L–390L)
2. Charlotte's Web
   E.B. White (4.4, MG, 680L)
3. Because of Winn-Dixie
   Kate DiCamillo (3.9, MG, 670L)
4. A Fine, Fine School

My Favorite Character
By Drew Daywalt, author of The Day the Crayons Quit

My knee-jerk response might be Dorothy Gale, or maybe Bilbo Baggins or even James Henry Trotter, but upon further reflection, it isn’t any of them, although they make fine runners-up.

The winner of this mental exercise, strangely, doesn’t even have a name. As a matter of fact, he didn’t even have his own book when he first graced me with his presence. You see, he’s the main character of an obscure picture book story by Dr. Seuss called “What Was I Scared Of?” He was in the last story, in a cluster of stories, in the 1961 book The Sneetches and Other Stories.

“What Was I Scared Of?” tells the tale of a prototypical Seussian character who happens to take lots of walks in deserted places at night. And to his horror, he always runs into the same ghostly apparition… a pair of pale green pants with no one inside them. The pants would run past our main character, animated and occupied as if by an invisible person. Our nameless main character, who I will simply call the narrator, does everything in his power to avoid bumping into these animated pants in his nocturnal sojourns, but inevitably the pair seem destined to meet over and over again. Eventually, the story ends with the narrator learning that the pants are just as scared of him as he is of them, and they end up becoming quite good friends.

Why is this unnamed picture book character my favorite literary character?
Well there are the...
During the 2018–2019 school year, 1,173,798 fourth graders each read, on average, 38.2 books and 306,272 words.

Top 20 Books Read: Grade 4

1. Diary of a Wimpy Kid Series
   Jeff Kinney (5.2–6.5, MG, 910–1060L)

2. Dog Man Series
   Dav Pilkey (2.3–2.6, LG, 280L–390L)

3. Fudge Series
   Judy Blume (3.3–3.6, LG/MG, 470L–560L)

4. Because of Winn-Dixie
   Kate DiCamillo (3.9, MG, 670L)

5. Wonder Series
   R.J. Palacio (4.2–4.8, MG, 790L)

6. Smile/Sisters/Guts
   Raina Telgemeier (2.4–2.6, MG, 290L–480L)

7. Frindle
   Andrew Clements (5.4, MG, 830L)

8. Stone Fox
   John Reynolds Gardiner (4.0, MG, 610L)

9. Island of the Blue Dolphins
   Scott O’Dell (5.4, MG, 1000L)

10. Captain Underpants Series
    Dav Pilkey (4.3–5.3, MG, 640L–890L)

11. A Bad Case of Stripes
    David Shannon (3.8, LG, 610L)

12. The Best Christmas Pageant Ever
    Barbara Robinson (5.1, MG, 760L)

13. Ghosts
    Raina Telgemeier (2.6, MG, 300L)

14. Shiloh Collection
    Phyllis Reynolds Naylor (4.4–5.0, MG, 860L–1020L)

15. Holes
    Louis Sachar (4.6, MG, 660L)

16. The One and Only Ivan
    Katherine Applegate (3.6, MG, 570L)

17. I Survived... Series
    Lauren Tarshis (3.8–5.1, MG, 590L–740L)

18. Percy Jackson and the Olympians Series
    Rick Riordan (4.1–6.7, MG, 590L–790L)

19. The True Story of the 3 Little Pigs
    Jon Scieszka (3.0, MG, 510L)

20. Dork Diaries Series
    Rachel Renée Russell (4.2–5.4, MG, 660L–890L)

continued from p. 19

obvious reasons: he’s easily relatable (I mean who wouldn’t be terrified of animated pants running around the woods at night), and he’s amusing (he flees pants; c’mon, that’s funny), and he’s in a story that strongly underscores empathy, friendship, and understanding.

But mostly, I chose this obscure Dr. Seuss character as my favorite literary character because he was my first favorite literary character. Without him, it’s possible that I would not have developed a love for reading, and without a love of reading, I would never have met any of my other beloved characters. Heck, for that matter, I doubt I’d even be a writer today.

So thank you Dr. Seuss, and thank you unnamed narrator character in the last story in a grouping of B-sides to *The Sneetches*. It’s because of you, I fell in love with reading.

Drew Daywalt

Originally from Ohio and the youngest of six children, Drew Daywalt grew up and went off to college in Boston, where he attended Emerson College and was mentored by children’s writer Jack Gantos. Daywalt is best known for his New York Times number one bestselling picture book *The Day the Crayons Quit*, which has been on the list for six years (and counting).
During the 2018–2019 school year, 1,153,475 fifth graders each read, on average, 28.7 books and 388,397 words.

Establishing Background Knowledge

How many topics are students exposed to while reading in a given school year?
With Accelerated Reader quizzes available on 200,000 books covering 60 unique topic areas, prior to high school, students tend to read books on about a third of these themes over the course of the year, with fewer topics read as older students hone their interests. (A topic was considered “read” if a student passed a quiz for more than one book on the subject.)

Topic exposure peaks in elementary grades as students explore their world through reading

Which topic areas do kids gravitate toward?
Students read a variety of books as they progress through each grade, yet they tend to be drawn to common themes at all ages.

Top nonfiction topics, grades K–12
- Animals
- Science
- Biographies/Autobiographies

Top fiction topics, grades K–12
- Animals
- Family Life
- Humor/Funny
Literacy experts agree that subject-matter knowledge and vocabulary are essential for reading comprehension. And when students read both deeply and widely—multiple books within and across different topics—they solidify that content knowledge while also strengthening comprehension skills.

**How does reading comprehension change when students focus on topics?**

When books capture students’ interests and they seek out additional reading on the same subjects, their background knowledge grows and reading quiz scores improve (APC).

**Do students understand certain topics better than others?**

Scores on comprehension quizzes (APC) show students’ interests drive their understanding.

### Easy and hard topics by grade range

- **Grades K–2**
  - Emotions: APC 84%
  - Good and Evil: APC 74%

- **Grades 3–5**
  - Legendary Characters: APC 85%
  - World/Global Issues: APC 75%

- **Grades 6–8**
  - Spy/Espionage: APC 87%
  - Biographies/Autobiographies: APC 76%

- **Grades 9–12**
  - Fantasy/Imagination: APC 83%
  - Military/Wars: APC 75%

Source: Accelerated Reader database, 2018–2019 school year
In the middle grades, the time students spend reading may start to decline, even as grade-level reading expectations begin to rise. Kids who aren’t reading enough not only miss out on the intrigue and escape reading can provide, but also miss gaining new vocabulary, additional background knowledge, a wider world view, and greater empathy for others.
Of the top 100 books read in grades 6–8, the book covers displayed in the map represent the books where the reading popularity in a state was in greatest contrast to the nationwide popularity ranking for that book. These are signature books for each state because kids who live there read the book shown far more often than it's read in the nation as a whole.

Motivation is key for sustained, daily reading practice. In middle school, it’s more important than ever to continually help students discover new books and topics. Inspire your 6–8 readers with the book lists on the next page:

- 20 most popular books for their grade
- 10 top nonfiction digital reads for their grade
- 3 sets of nonfiction and fiction book pairs of increasing text difficulty on social studies, science, and arts topics for their grade range

As you peruse the lists, note: Each book includes readability info (ATOS level, Interest Level, and Lexile measure) to help guide students’ individual book searches. Series titles are grouped as single entries to allow as many unique book recommendations as possible. The icons \( \text{NF} \), \( \text{SP} \), and \( \text{myON} \) indicate titles on nonfiction topics, available to read/quiz on in Spanish, and/or available in myON. Popular author Melissa Stewart has contributed an essay on her favorite character—literary or otherwise—which is found in the sidebar on p. 29.

For more on the data used in this report, see p. 46.
During the 2018–2019 school year, 754,468 sixth graders each read, on average, 16.9 books and 404,001 words.

Who is my favorite character?

For many people, this seems like a fun, easy question, but consider this: not everyone is naturally drawn to stories and storytelling. Look around your classroom. Some students connect strongly to the characters they encounter in stories. But others... not so much. They’d rather soak up facts, ideas, and information about topics they find fascinating. These “info-kids” read with a purpose. They want to understand the world and how it works and their place in it. They want to learn about the past and the present, so they can envision the future stretching out before them.

I’m an info-kid. And I’m not alone. Studies show that 40 percent of elementary students prefer to read expository nonfiction—true books that explain, describe, or inform in a clear, interesting way.

So instead of writing about a fictional character, I’m going to share some fun facts about one of my favorite animals—the American pika. Trust me, it’s a REAL character.

For starters, the American pika is one of the most adorable animals on Earth. To see for yourself, do a Google search to find some photos and display them on the interactive whiteboard in your classroom. I don’t mind waiting.

See what I mean? Adorable!

These fluffy furballs live on rocky mountain slopes in the western US and Canada. They weigh about as much as an apple, and they’re small enough to sit in your hand.

---

- **Free At Last: The Story of Martin Luther King, Jr.**, Angela Bull (5.7, LG, 820L)
- **How to Speak Cat**, Aline Alexander Newman (830L)
- **Animal Invaders**, Amanda Doering Tourville (6.1, MG, 860L)
But don't let that fool you. These itty-bitty beasts aren't afraid of a fight. A pika will battle fiercely to defend its den. What’s so valuable that it’s worth protecting? Food. A pika spends all summer stockpiling grass and leaves for winter. Hour after hour, it rips plants out of the ground, scurries to a sunny spot, and carefully lays the greens out to dry. Then it piles the plants in a “haystack.” By autumn, the stash could fill 9 one-gallon milk containers.

Like rabbits and guinea pigs, American pikas produce two kinds of droppings—soft pellets and hard poop. Believe it or not, pikas eat the soft pellets because they’re full of partially-digested food. It may seem like a hideous habit, but it helps the mini-mammals get the nutrients they need to live and grow.

So what do you think? Now that you know a little bit about the American pika, is it one of your favorite animals too?

Melissa Stewart
Melissa Stewart is the award-winning author of more than 180 science books for children, including Seashells: More than a Home and Pipsqueaks, Slowpokes, and Stinkers: Celebrating Animal Underdogs. She enjoys speaking at schools and chatting with teachers and students via Twitter. Her website is bursting with resources for teaching nonfiction writing:

www.melissa-stewart.com
During the 2018–2019 school year, 477,357 eighth graders each read, on average, 9.7 books and 378,979 words.

Title, Author (ATOS level, Interest level, Lexile measure)
As students move through schooling, their everyday learning is preparing them for their future. MetaMetrics’ Lexile® Career Database provides the only available data on how students’ reading test scores relate to the entry-level reading demands of careers. These occupational reading demands were determined by researching and measuring the text complexity of textbooks, professional training manuals, recruitment materials, and other career-related sources individuals use to prepare for their first post-secondary career, either on the job or in college.

What are the reading demands of popular careers?

Example occupational reading levels per Lexile Career Database

**Electricians** will likely encounter training materials ranging from a reading level of 1200L to 1460L.

An example book in this reading range is *Fast Food Nation* by Eric Schlosser.

**Registered Nurses** will likely encounter training materials ranging from a reading level of 1260L to 1410L.

An example book in this reading range is *A Brief History of Time* by Stephen W. Hawking.

**Lawyers** will likely encounter training materials ranging from a reading level of 1300L to 1570L.

An example book in this reading range is *Don Quixote* by Miguel de Cervantes Saavedra.
In high school, students are preparing for the next phase of their lives. After graduation, these young adults will need specific skills and knowledge to meet the challenges of higher education, technical schooling, military service, or the workforce.
High schoolers should not only read often with understanding, but also in ways that stretch their thinking and challenge them. Inspire your 9–12 readers with the book lists on the next page:

- 20 most popular books for their grade
- 10 top nonfiction digital reads for their grade
- 4 sets of nonfiction and fiction book pairs of increasing text difficulty on social studies, science, arts, and social emotional learning topics for their grade range

As you peruse the lists, note: Each book includes readability info (ATOS level, Interest Level, and Lexile measure) to help guide students’ individual book searches. Series titles are grouped as single entries to allow as many unique book recommendations as possible. The icons NF, SP, and myON indicate titles on nonfiction topics, available to read/quiz on in Spanish, and/or available in myON. Popular authors Isabel Thomas and Janet Riehecky have contributed essays on their favorite characters—literary or otherwise—which can be found in the sidebars on pp. 39 and 45.

For more on the data used in this report, see p. 46.
During the 2018–2019 school year, 96,911 ninth graders each read, on average, 6.2 books and 280,132 words.

- Usain Bolt, Saddleback Educational Publishing (130L)
My Favorite Character
By Isabel Thomas, author of Moth: An Evolution Story

My favourite character is character itself. When I began writing nonfiction 15 years ago, story and character were firmly associated with fiction. These were the books offering a portal to adventure by slipping readers into someone else’s shoes. Nonfiction was seen as a source of facts, a way to get your homework done. Happily, this is no longer the case. Children, teachers, and parents are embracing narrative nonfiction, and there is no narrative without character.

These are often real-life characters, in stories of lives well-lived. Today’s lavishly illustrated biographies are nothing like encyclopaedia entries. Inside their pages, children can join a young Nelson Mandela on his adventures in the rolling hills of South Africa, build a garden rollercoaster with Amelia Earhart, or feel nine-year-old Marie Curie’s incredulity when her teacher insists she control her curly hair. Details like this make history relevant and relatable. They show children that scientists, explorers, and world-changing activists are people just like them.

Children gravitate to these character-led books. Looking back to What Kids Are Reading, 2019, it’s notable that readers’ best-loved nonfiction titles were the memoirs of Elie Wiesel and Raina Telgemeier, and many of the popular digital nonfiction titles were biographies. However, the power of character can extend far beyond biography. In my picture book, Moth: An Evolution Story, winner of the 2020 AAAS/Subaru Children’s Science Book Prize, peppered moths break free from the dry textbook presentation to become characters in a story. Character gives readers someone (or

continued on p. 41
During the 2018–2019 school year, 74,764 tenth graders each read, on average, 5.4 books and 285,604 words.

something) to root for. It keeps children turning the page, helping them to make an emotional connection with a subject. This connection makes the science easier to understand and to remember.

I would like to see storytelling and character used widely in STEM learning and teaching. Young people learn about the arts and humanities by striving to see the world through the eyes of others. In contrast, science is too often condensed to a list of facts and theories. Bite-sized nuggets of information delight some readers, but for many they are not accessible. As adults, our existing knowledge helps us to put new information into context and grasp its significance. For young readers, this is difficult or impossible. I use character to overcome a reader’s lack of experience, to build a bridge from their starting point to new understanding—and new passions. We may not know anything about a topic before we pick up a book, but we can all relate to a character’s hopes, dreams, humour, and resilience.

Create a Custom Report

What are kids in your state reading? Find out when you create your own custom What Kids Are Reading report in three simple steps:

2. Use the filters to select state, grade, reading level, and more.
3. Click “Generate My Report” for a PDF you can save or print.

Title, Author (ATOS level, Interest level, Lexile measure)
During the 2018–2019 school year, 42,217 twelfth graders each read, on average, 5.0 books and 250,436 words.

**Top 20 Books Read: Grade 12**

1. *Hamlet*  
   William Shakespeare (10.5, UG)
2. *Frankenstein (Unabridged)*  
   Mary Shelley (12.4, UG, 1040L)
3. *Macbeth*  
   William Shakespeare (10.9, UG)
4. *Animal Farm*  
   George Orwell (7.3, UG, 1370L)
5. *The Kite Runner*  
   Khaled Hosseini (5.2, UG, 840L)
6. *Of Mice and Men*  
   John Steinbeck (4.5, UG, 630L)
7. *Night*  
   Elie Wiesel (4.8, UG, 590L)
8. *The Hate U Give*  
   Angie Thomas (3.9, UG, 590L)
9. *To All the Boys I’ve Loved Before Series*  
   Jenny Han (4.2–4.5, UG, 630L–700L)
10. *Lord of the Flies*  
    William Golding (5.0, UG, 770L)
11. *Hunger Games Trilogy*  
    Suzanne Collins (5.3–5.3, MG/MG+, 800L–820L)
12. *The Great Gatsby*  
    F. Scott Fitzgerald (7.3, UG, 1010L)
13. *1984*  
    George Orwell (8.9, UG, 1090L)
14. *Brave New World*  
    Aldous Huxley (7.5, UG, 870L)
15. *The Metamorphosis*  
    Franz Kafka (10.5, UG, 1340L)
16. *Divergent Series*  
    Veronica Roth (4.8–5.8, UG, 700L–850L)
17. *Maze Runner Series*  
    James Dashner (3.3–5.7, MG/UG, 720L–810L)
18. *Oedipus the King*  
    Sophocles (5.6, UG, 1110L)
19. *The Twilight Saga*  
    Stephenie Meyer (4.5–7.6, UG, 670L–720L)
20. *Harry Potter Series*  
    J.K. Rowling (3.9–8.8, MG/MG+, 500L–1230L)

**Popular Digital Nonfiction Reads: Grade 12**

- *A World After Fossil Fuels*, Liz Gogerly (1040L)
- *Stories of Women’s Suffrage: Votes for Women!*, Charlotte Guillain (7.5, MG, 1100L)
- *Should Scientists Pursue Cloning?*, Isabel Thomas (7.6, MG, 1060L)
- *Sustaining Our Natural Resources (Freestyle)*, Jen Green (7.5, MG, 840L)
- *Why? Answers to Everyday Scientific Questions*, Joel Levy (1250L)
- *Brain Injuries in Football*, Stephanie Watson (1060L)
- *Bullying*, Laura Perdew (1150L)
- *Kanye West*, Saddleback Educational Publishing (760L)
- *Evolution*, Sarah Eason (1152L)
I always root for the underdog, so I’ve loved many characters in children’s literature, but my favorite is Menolly in *Dragonsong* by Anne McCaffrey. Set in a fantasy world called Pern, the story focuses on Menolly’s struggles to fit in. She has a gift for music; however, the culture that she lives in thinks only men should compose songs. After her mentor dies, there’s no one in her community, called Half-Circle Hold, who understands what is inside her, and she is miserable. I can identify with her because while I was growing up, I was such a bookworm that I didn’t fit in with other kids.

Menolly is forbidden even to sing, and when her father hears her playing a melody she wrote herself, he beats her. She realizes she can’t stay in Half-Circle Hold anymore and runs away. It takes a lot of courage for her to do so. There are no other holds nearby that she can take refuge in, and a terrible substance called Thread drops from the sky at regular intervals. Thread is an acid-like material that burns anything it touches. Menolly takes refuge in a cave where she is safe. Her courage and resourcefulness make me admire her and want her to succeed. But there’s another element that makes me love Menolly and this book. I love the idea of magical beasts. On this world, gigantic dragons bond with individuals, and the dragons and their riders fight the Thread by searing it with fire before it can reach the ground. They are...
Every text is an opportunity for a child to fall in love with reading.
What Kids Are Reading is designed to help you find great reads for the students you support—because every text is an opportunity for a child to fall in love with reading.

This report draws from two data sources: Accelerated Reader data, which tracks the books and articles (print and digital) that students have read from start to finish, and myON data, which monitors student reading on a personalized digital library platform. Combined, these two sources provide insight into millions of students’ reading habits. No other study captures student reading behavior on this scale.1

How to Use This Report

Start by flipping to the book lists for your grade level to see the books your students’ peers are reading, which include the most read books overall and popular digital nonfiction selections. For your readers who seek more challenge, look ahead a grade or two. For students reading below grade level, search for titles on their grade-level lists with lower ATOS or Lexile readability levels.

Students of all ages love a good read aloud—and children often can comprehend more complex material when it’s read aloud to them than when they read it independently. Helping kids access literature they are interested in, but may be unable to read on their own, is a great way to foster positive relationships between students and reading.

To find book suggestions that complement your teaching, turn to the cross-curricular connections lists, where you’ll find nonfiction and fiction book pairs of increasing text difficulty on social studies, science, and arts topics for each grade range (plus a bonus social emotional learning list for grade 12).

Remember, students should play an active role in selecting reading materials. Research has shown that as students grow as readers, it is increasingly important they have a say in what they read (Allington, 2012; Guthrie & Humenick, 2004; Worthy & McKool, 1996). Choice is motivating for students and helps foster a lasting love of reading.

In addition to the book lists in What Kids Are Reading, also examine the three research sections that analyze data on exploring nonfiction reading, establishing background knowledge, and making career connections, as well as five engaging essays by the popular authors whose books populate this report.

1 Note: Renaissance is deeply committed to protecting school and student data. For all publications, we provide aggregated data useful to educators, families, and researchers, but do not release information that could identify any district, school, teacher, or student. For more on our data security and confidentiality practices, see www.renaissance.com/privacy-policy. Also, we recognize not all student reading is captured through Accelerated Reader and myON; however, for users of these tools, we know much reading practice activity is captured this way.

Janet Riehecky

Janet Riehecky is a college professor and the author of 134 books for children, ranging from preschool picture books to middle grade biographies and mysteries. She served as National Director of Kids Love A Mystery, a literacy program, from 1998 to 2004, and has been a network representative for SCBWI since 2007.
Matching Books to Students

When using this report to find students’ next great read, be sure to consider not only text complexity, but also book Interest Level as well as content, structure, student motivation, and background knowledge.

**Text complexity:** Studies have shown that students learn more when reading texts at or above their independent reading level (Renaissance, 2015). Two of the most popular ways to measure a text’s complexity, or difficulty level, are the ATOS Readability Formula and the Lexile Framework® for Reading. Both measures put readers and texts on the same scale to help in matching students with reading materials at their individual levels.

The ATOS Readability Formula considers three important predictors of text difficulty: average sentence length, average word length, and average word-difficulty level. ATOS is reported on a grade-level scale—for example, an ATOS level of 5.4 indicates that text could likely be read by a fifth-grade student in the fourth month of the school year. Visit Renaissance Accelerated Reader Bookfinder® to find ATOS levels for nearly every book in your school’s library: [www.arbookfind.com](http://www.arbookfind.com).

Renaissance pairs the ATOS measure with Interest Level guidelines to indicate the sophistication and maturity level of a text’s content, ideas, and themes: LG for lower grades (K–3), MG for middle grades (4–8), MG+ for middle grades plus (6 and up), and UG for upper grades (9–12). While interest levels are based on publisher recommendations, whether a text is appropriate for a student is a local decision best made by educators, parents/guardians, and students.

The Lexile Analyzer® evaluates text complexity by measuring text characteristics, such as sentence length and word difficulty. The outcome is a Lexile measure—a number followed by an L, which can range from below 0L for beginning readers to above 1600L for advanced texts. A chart depicting Lexile reader measure ranges by grade level is available at [hub.lexile.com/lexile-glc](http://hub.lexile.com/lexile-glc). For more information and to analyze texts for free, visit [hub.lexile.com/la](http://hub.lexile.com/la).

Lexile measures found in this report were provided by the developer of the Lexile Framework, MetaMetrics®, Inc.
About Accelerated Reader

Accelerated Reader is a research-based reading-practice program that equips teachers with unparalleled insight into independent reading practice, personalized goal-setting tools, activities spanning a variety of skills and text types, and a worldwide community of support.

How Accelerated Reader works: For independent reading, first the teacher sets students’ personalized reading goals, focusing on key factors for successful reading practice: quantity (time spent reading), quality (comprehension), and difficulty (text complexity level). Next, each student selects and reads a book or article, and then completes a short Accelerated Reader practice quiz. The digital quizzes provide students with immediate feedback, which is shared with the teacher, about comprehension level and number of words read.

With quizzes for 200,000 books and new quizzes constantly added, Accelerated Reader offers vast reading options. In addition, the program’s Discovery Bookshelf provides personalized suggestions that help students find their next great read.

The data in this report: We studied the Accelerated Reader records for 7.6 million students in grades K–12 at 24,985 schools, across all 50 states and the District of Columbia, who read 271 million books during the 2018–2019 school year (see table at left). This massive Accelerated Reader report sample, although one of convenience, includes a diverse group of students, roughly representative of US schools (see demographic information above). The top 20 books by grade are drawn from this data set.

2 Report sample data is based on school-level percentages from the Education Database (Market Data Retrieval). National data is from National Center for Education Statistics: https://nces.ed.gov/programs/digest/current_tables.asp.

**About myON**

myON is a student-centered, personalized literacy platform that offers unlimited access to thousands of enhanced digital books. We also offer myON News, which gives students authentic, age-appropriate reporting on timely topics and current events.

**How myON works:** After students take quick assessments to identify their reading level and interests, myON matches them with “just-right” books. Teachers can assign books or encourage students to self-select independent reading materials from as many as 13,000 digital books, including graphic novels, picture books, and Spanish-language texts.

Thanks to a robust set of interactive literacy tools, students can interact with myON’s digital texts in ways that would not be possible with shared physical texts or e-book subscriptions. At the same time, teachers can easily monitor students’ engagement and growth to help keep all learners on track for literacy success.

**The data in this report:** We studied the 105,518,942 books opened in myON over the 2018–2019 school year. Overall, students read more than 827,885,052 minutes in myON—approximately 13,798,084 hours, 574,920 days, or 1,575 years of reading—and almost 2 billion pages over the school year. The lists of popular digital nonfiction reads for each grade are drawn from this data set.

Visit the What Kids Are Reading website for our Custom Report Builder tool and more: [www.renaissance.com/wkar](http://www.renaissance.com/wkar).

In addition to helpful reports for educators, myON includes a Student Profile snapshot for at-a-glance information on individual student reading activity that can be easily accessed by students and shared with families.
