Minnows are small fish.

They live in ponds.

They live in rivers.

It is summer.
Time to lay eggs.

A male minnow makes a nest.
He finds a good spot.
It is under a rock.

The female likes it.
She lays eggs.

She does not stay.
Daddy cares for the eggs.

His job is done!
Look! Baby fish come out of the eggs.

He keeps them safe.
