

The Legend of Bigfoot

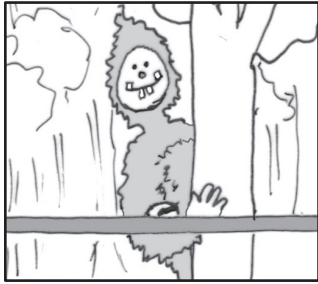

Mary Johnson lived alone in the woods. She lived in the hills. She liked the peace and quiet.

Mary looked outside one day. She saw something in her yard. It was large and furry. It scared her. She hid.

Mary went to another window. She looked out. She saw an animal. It was tall and strong. It had dark hair from head to toe. It walked on two legs. Was it a bear? No, it didn't walk like a bear. It walked more like a human. Mary knew it wasn't a regular animal. It was Bigfoot!

There are many stories like this out there. There are many stories of Bigfoot sightings.

The Legend of Bigfoot

Bigfoot is a legend. Bigfoot isn't real. But some people still think that he is. Some people write books about seeing him. Some people go out to look for him in the woods.

Some say that Bigfoot is real. But there is no proof. No one has found Bigfoot's hair. No one has found parts of a dead Bigfoot. No one has even found a footprint.

Lots of people try to prove that Bigfoot is real. They say they have proof. But it is fake. Some take photos of him. But the photos are always too blurry. Some take videos of him. But the videos are a trick. Bigfoot is really a man dressed as an ape. Some say they have Bigfoot's body. People pay them to see the body. The body looks very real. But it is fake. It is a doll. It is not Bigfoot.

Bigfoot stories pop up every few years. People say they saw an unusual animal. They say it can only be Bigfoot. Normal people, too. Not just oddballs.

So what do you think? Is Bigfoot out there?
