Eastern Cottontails
Baby Rabbits Grow Up

This is a mommy rabbit.
She makes a nest.

She has babies.
They are small.

They get bigger.
Eastern Cottontails

And bigger.

And bigger.

Then one day...
They are adults.
Eastern Cottontails
Baby Rabbits Grow Up

Mommy rabbit makes a nest.

She digs it in the ground.

Mommy makes it soft.

Mommy puts her fur in it.

Mommy has babies.

The babies are called kits.

The kits are small.

The kits get bigger.
Eastern Cottontails

And bigger.

And bigger.

Then one day...
The kits are adults.
Eastern Cottontails
Baby Rabbits Grow Up

A mommy rabbit makes a nest.
She digs a hole in the grass.
She pulls out some fur.
She puts it in the nest.
This makes it soft.
She will cover the nest with grass to hide it.

The mommy rabbit has babies.
Baby rabbits are called kits.
The kits are very small and naked at first.
Their eyes are closed.

The kits grow quickly.
They grow fur and their eyes open.
Eastern Cottontails

They get bigger.

And bigger.

Then one day...
They are all grown up.
Now the kits are adults.
