Baby Rabbits Grow Up

By James William R, U.S. Fish and Wildlife Service [Public domain], via Wikimedia Commons

Mommy rabbit makes a nest.

She digs it in the ground.

Mommy makes it soft.

Mommy puts her fur in it.

By Jharsonxi [Own work] [CC BY-SA 3.0 (<https://creativecommons.org/licenses/by-sa/3.0/>) or GFDL (<http://www.gnu.org/copyleft/fdl.html>)], via Wikimedia Commons

Mommy has babies.

The babies are called kits.

The kits are small.

By Julancolton [Own work] [CC0], via Wikimedia Commons

The kits get bigger.

Baby Rabbits Grow Up

By James William R, U.S. Fish and Wildlife Service [Public domain], via Wikimedia Commons

A mommy rabbit makes a nest.

She digs a hole in the grass.

She pulls out some fur.

She puts it in the nest.

This makes it soft.

She will cover the nest with grass to hide it.

By Jhansonxi [Own work] [CC BY-SA 3.0 (<https://creativecommons.org/licenses/by-sa/3.0/>) or GFDL (<http://www.gnu.org/copyleft/fdl.html>)], via Wikimedia Commons

The mommy rabbit has babies.

Baby rabbits are called kits.

The kits are very small and naked at first.

Their eyes are closed.

By Juliancollton [Own work] [CC0], via Wikimedia Commons

The kits grow quickly.

They grow fur and their eyes open.

And bigger.

By Gareth Rasberry (Own work) [CC BY-SA 3.0 (<https://creativecommons.org/licenses/by-sa/3.0/>)], via Wikimedia Commons

Then one day...

They are all grown up.

Now the kits are adults.
